

# IDD-636160S

160W DC/DC Converter Module

## Features

- » Wide input range 6-36 VDC
- » Selectable output voltage +12V, +19V or +24VDC
- » Extended temperature range -20 ~ +70°C
- » High efficiency up to 98%
- » Compact design
- » Including thermal pad for chassis mounting

## Specifications

|                       |                                   |
|-----------------------|-----------------------------------|
| <b>Input</b>          |                                   |
| Voltage               | 6-36V DC                          |
| <b>Output</b>         |                                   |
| Voltage               | 12 or 19 or 24V DC via DIP switch |
| <b>General</b>        |                                   |
| Watt                  | 160W (Max. total output)          |
| Efficiency            | 0.98                              |
| Operating temperature | -20°C ~ 70°C                      |
| Storage temperature   | -40°C ~ 84°C                      |
| Dimensions            | 40 x 95 x 19.25 mm                |

## Ordering Information

|                 |  |
|-----------------|--|
| IDD-636160S-R10 | 160W DC/DC 6~36V input, multiple 12/19/24V output power module, RoHS |
|-----------------|--|
